SPRING SESSION CONTINUES TO GROW

by S.C.T. Clarke, Director

Since its inception in 1972, Spring Session has enrolled more students each year: 1,234, 2,081, and this year 2,664. The faculty with the largest enrolment was Education with 1,216 students or 45.6 percent of the total, followed by Arts with 413 or 15.5 percent of the total, and Business Administration and Commerce with 260 students and 9.8 percent of the total. Science, Graduate Studies, Nursing, Physical Education, Household Economics, Rehabilitation Medicine, Agriculture, Engineering and some other faculties and schools were also represented.

As enrolment increases, so do course offerings. This year just over 100 sections of full course equivalents were provided, 41 (or 40 percent) by the Faculty of Arts, 33½ (or 32 percent) by the Faculty of Education, and 9½ (or 9½ percent) by the Faculty of Science. There were 76½ full course equivalents offered in Spring Session 1973.

This year Spring Session commenced May 6 and ended June 14. All but two of the 148 instructors were from our own staff, there being only two visitors.

A questionnaire to secure information about students was prepared with the assistance of, and analyzed by, Institutional Research and Planning. It secured a 64 percent response, and revealed that 53 percent of Spring Session students were also enrolled in Summer Session. Most of the remainder were either going to start work (35 percent) or look for work (26 percent). As in the past, the chief reason given by students (81 percent response) for attending was to accelerate their progress, although a significant 10 percent stated that they were "catching up" on requirements for a changed degree or diploma. Student load, in terms of courses, was: one-half course, 21 percent of students; one full course or equivalent, 53 percent; one and one-half courses, 14 percent; and two full courses or equivalent, 12 percent. The continuity of attendance at these special sessions is not great: more than half of the students registered in Spring Session 1974 did not attend either Spring Session 1973 or Summer Session 1973, and only five percent attended both of these.

With such a flourishing Spring Session

much of the University is on a twelve-month basis in teaching as well as in study and research.

■ PETER A. WATTS, at present Co-ordinator of University Information Systems at Queen's University, has accepted an appointment here as Director of the Office of Administrative Systems. Mr. Watts, who has had extensive experience in both university and business environments, will take up his new post September 1.

■ DONALD L. FLOCK, Professor of Mineral Engineering and Associate Dean of Engineering, is the 1974 winner of the Past Presidents' Memorial Medal of the Canadian Institute of Mining and Metallurgy (CIM). CIM President J. P. NOWLAN made the presentation "in recognition of his [Dr. Flock's] professional achievements in the field of petroleum engineering, his service to the Institute in general and its Petroleum Society in particular, and his leadership and encouragement to students and young engineers."

■ At the recent meeting of the Canadian Urological Association in Ottawa, JOHN MILNER of Edmonton received the Prize Essay Award presented annually to the resident preparing the best paper of urological research. Dr. Milner, who completed his MSc last year, worked under the supervision of W.H. LAKEY, Professor of Surgery, on the problems of kidney preservation at the Surgical Medical Research Institute. This research project is part of a series of studies on kidney tissue preservation undertaken by the Division of Urology at The University of Alberta under a grant from the Medical Research Council of Canada. Dr. Milner's paper was chosen from seven papers submitted by urology residents across Canada. Dr. Milner and his
